

With its excellent durability, fine texture and great wear tolerance, West Coast Turf's 100% rye is the sod-of-choice for classic, all-rye golf courses. Because it can tolerate close mowing, 100% rye is often used on golf course collars—the area between the fairway and green—for the perfect contrast in texture. Also for use on sports fields and commercial and residential lawns.

## For sports fields, golf courses and lawns.

### Options

**Regular sod** comes in 16" x 72" rolls with 1/2" of soil. Each weighs approximately 45 pounds. Great for normal conditions.

**Big-roll sod** is 42" x 105', allowing large areas to be sodded quickly and efficiently. Great for large sports fields, parks, cemeteries and golf courses.

**Thick-cut sod** has up to a 2" soil base that provides anchorage for the sod until its roots knit to the subsoil. Ideal for renovating a sports field that needs to be back in play within a few days.

**Washed sod** has had soil removed from the roots to help eliminate sod-to-soil incompatibilities and to help the sod knit to the soil faster. Reduces shipping weight.

### Turfgrass Warranty

*The grass is guaranteed to be in vigorous condition, weed- and disease-free upon delivery to the site. No other warranty is offered or implied.*
