

TifSport was developed by USDA/ARS geneticist Dr. Wayne Hanna at the University of Georgia Coastal Plains Experiment Station in Tifton, GA. This is the same breeding program initiated by Dr. Glenn Burton, the program responsible for Tifgreen, Tifdwarf, TifEagle, and Tifway 419. Tifway 419 has long been the standard for sports fields, golf courses, and home lawns. In response to the worries over genetic vulnerability of Tifway 419, the need for better pest and disease resistance, and the search for greater cold tolerance, Dr. Hanna and his team set out to develop a new bermuda. TifSport is the result. For use on golf course tees and fairways, sports fields, parks, and commercial and residential lawns.

For sportsfields, golf courses, parks, and home lawns.

TifSport is the turf choice of several of the nations top pro and college sports fields and many world-class golf courses.

West Coast TifSport at a Glance:

- Closer mowing heights.
- Impressive leaf texture.
- Dark green color.
- Cold tolerant.
- Drought tolerant.
- Wear tolerant.
- Good lateral growth.
- Superior turf density.

Features and Benefits

Color

- Beautiful dark emerald green (darker than Tifway 419).

Texture

- Medium-fine.

Performance

- Better cold tolerance than Tifway 419.
- Highly pest resistant.
- Superior drought tolerance.
- Stays greener longer than Tifway 419, and recovers faster.
- Impressive root system. Good lateral stolon growth and deep, complex vertical root structure.
- Excellent traffic tolerance.
- Superior density—1 point greater than Tifway 419 on a 1-10 scale.
- Upright growth habit gives golf ball a good lie.

Climate

- Thrives in warm to hot climates, USDA zones 7-11.

Shade Tolerance

- Not shade tolerant, performs best in full sun.

Maintenance

- Moderate level of maintenance required.
- Fall overseeding may be required in cold winter climates.

Mowing

- 1/2" to 1".

TifSport enhances any lawn, be it a park or home, with its pest resistance and superior turf density.

How To Specify TifSport Bermuda

When ordering, please specify sod or stolons. Sod options are regular, big-roll, thick-cut, washed and overseeded. Ask about our custom growing service for special turfgrass mixes. Other options available from West Coast Turf are expert installation and shipping anywhere in the world.

West Coast Turf— A Full-Service Company

We ship anywhere in the world! Our trucks are standing by to deliver your turf fresh and ready to plant. We can also prepare your turfgrass for shipping by air to any overseas destination. Your turf will arrive healthy and on time.

We can install your new sod!

For any type of project, no matter the scope or location, our skilled crews will use their specialized high-tech equipment to install your new turf quickly and dependably. You can count on our experts to get the job done right the first time.

We can grow your special blend

Need a specific blend or mix of turfgrass? Our expert farm crews can grow sod to meet your specific requirements—and on time.

To Order or For More Information

Turfgrass Warranty

The grass is guaranteed to be in vigorous condition, weed- and disease-free upon delivery to the site. No other warranty is offered or implied.

TifSport offers durability and toughness along with dark green color and a fine soft texture.

Options

Regular sod comes in 16' x 72' rolls with 1/2" of soil. Each weighs approximately 45 pounds. Great for normal conditions.

Big-roll sod is 42' x 105', allowing large areas to be sodded quickly and efficiently. Great for large sports fields, parks and cemeteries.

Thick-cut sod has up to a 2" soil base that provides anchorage for the sod until its roots knit to the subsoil. Ideal for renovating a sports field that needs to be back in play within a few days.

Washed sod has had soil removed from the roots to help eliminate sod-to-soil incompatibilities and to help the sod knit to the soil faster. Reduces shipping weight.

Overseeded sod is perfect for fall-season installation. No need to overseed!
