

Field Removal
and TopMaker Field
Recycling Services

The Revolutionary
Concept in Golf and
Sports Turf Renovation

THE PERFECT SOLUTION FOR THE PERFECT FIELD.

- > The Field TopMaker is the machine to bring natural turf surfaces into perfect condition.
- > Can be used in a number of ways to level, clean, de-thatch, and renovate turf areas, as well as the harvesting of sprigs.
- > It is ideal to remove minor “bumps” on soccer fields, golf courses, polo fields, municipal grass areas and sod farms.
- > Consists of a series of blades which can be adjusted from 5 cm above the surface to 5 cm below the surface. The cut material can be deflected back on to the surface, or transferred by built-in conveyors directly into trailers for removal off site.
- > A typical soccer field can be removed and cleaned in one or two days.
- > By adjusting the machine accurately it can remove weeds, thatch layers or a complete surface.
- > Advantages are water draining ability. Soil life and stability will not be disturbed. Another advantage is to install rolls of turf or to plant plugs immediately after stripping the surface.
- > Field and golf surfaces can also be brought back to a perfect condition and be back into play immediately if needed or fully rooted after 6 weeks time with a completely new playing surface.
