

St. Augustine

St. Augustine is the most shade tolerant of all warm season lawn turfgrasses.

St. Augustine is a cultivar notable for its exceptional cold tolerance and extended growing season. Its deep root system provides superior drought and heat tolerance. Its dark-green color and medium-fine blade delivers exceptional uniformity under a wide range of light conditions. For use on commercial and residential lawns.

FEATURES AND BENEFITS

Color

- > Beautiful dark green

Texture

- > Medium-coarse

Performance

- > Can grow in a variety of light conditions including shade.
- > Deep root system ensures drought tolerance.
- > Provides excellent heat and cold tolerance and extended growing season.
- > Finer texture and improved color.
- > Tolerates a wide variety of climates and soil conditions.

- > Rapid horizontal spread but slower vertical growth than even some dwarf fescues.
- > Requires only moderate fertility and irrigation.
- > Pet mess resistant.

Climate

- > Thrives in warm to hot climates, USDA zones 8 to 11.

Shade Tolerance

- > Highly shade tolerant, requires full sun part of the day.

Maintenance

- > Requires moderate level of maintenance.

Mowing

- > 1-1/2"-3"

How To Specify St. Augustine

Available as sod only. Ask about our custom growing service for special turfgrass blends and mixes. Other options available from West Coast Turf are expert installation and worldwide shipping.

Options

- > **Regular sod comes in 16" x 72" rolls with 1/2" of soil. Great for normal conditions.**
- > **Thick-cut sod has up to a 2" soil base that provides anchorage for the sod until its roots knit to the subsoil.**
- > **Washed sod has had the soil removed from the roots to help eliminate sod-to-soil incompatibilities, and to help the sod knit to the soil faster. Reduces shipping weight.**
